PROFESSIONAL SUMMARY

Engineering student with a strong foundation in Java, SQL and Python, backed by hands-on data analytics internship experience. Skilled in building data-driven solutions with MySQL, Power BI and Excel, and in applying object-oriented principles to develop reliable applications. Adept at problem solving, analytical thinking and collaborating in team environments to deliver measurable results.

SKILLS

Programming & Querying: Java, SQL, Python

Core Java: OOP, Collections, Exception Handling

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Databases & BI Tools: MySQL, Advanced Excel, Power BI, Tableau

Analytics & Version Control: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, GitHub

EXPERIENCE

Data Analyst Intern | Ybi Foundation (Remote)

December 2024 - January 2025

Tools: Excel, SQL, Power BI, Python

- Uncovered customer churn drivers across **7,043 telco records** by analyzing tenure, contract type and monthly charges in Python, pinpointing that **38% of churned users** were on monthly contracts within a 3-month tenure.
- Delivered **6 Matplotlib visualizations** (histograms, box plots, heatmaps) that mapped churn-prone customer segments, translating the findings into early-engagement recommendations to improve retention.
- Strengthened end-to-end analytics delivery by applying NumPy, Pandas, Excel, Power BI and MySQL to clean, transform and visualize raw datasets during the internship.

PROJECTS

Student Management System

Java, JDBC, MySQL

- Built a console-based Java application using OOP principles to manage student records covering enrollment, grade tracking and attendance.
- Integrated JDBC with MySQL for CRUD operations to enable persistent storage and retrieval of data, and implemented exception handling for invalid inputs and database errors.

Customer Shopping Behavior Analysis

Python, SQL, Power BI

- Built an end-to-end analytics pipeline on **3,900 customer transaction records** using Python, MySQL and Power BI, producing a dashboard that surfaced **\$233K revenue, 27% subscription rate** and **\$59.76 average order value**.
- Performed data cleaning, preprocessing and exploratory analysis to uncover purchasing patterns and revenue trends, supporting data-driven retention and loyalty strategies.

Zepto Inventory Intelligence

SQL, Power BI

- Cleaned and processed **3,732 rows** of inventory data in SQL through duplicate removal, category standardization and price conversion, ensuring accurate product and pricing records.
- Built interactive Power BI dashboards covering inventory value, stockout trends, pricing tiers and discount impact, identifying a **28.57% stockout rate** in high-demand categories to guide restocking.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

2023 - 2027

Panimalar Engineering College, Chennai | CGPA: 8.66 / 10

Relevant Coursework: Data Structures, DBMS, Object-Oriented Programming, Data Analysis, Machine Learning

CERTIFICATIONS

Cisco Data Analytics Essentials - Cisco Networking Academy (2025)
